## AllStent Joins Berkeley SkyDeck Europe, Secures €145K Investment

---

*“We are excited to join SkyDeck and leverage its world-class ecosystem to accelerate our growth and impact in TEVAR surgery,”* Paul Chipperton, CEO of AllStent.

Date of release: Wednesday April-2

Locations: Toronto, Canada; and Milan, Italy

AllStent, with Business, Finance and Regulatory operations in Toronto, Canada; and Research & Development in Milan, Italy, is pleased to announce being selected for the **Berkeley SkyDeck Europe** acceleration program. As part of this prestigious initiative, AllStent completed a six-month program split between Berkeley, California, and Milan, Italy, gaining access to top-tier mentorship, strategic partnerships, and global investor networks.

The collaboration between UC Berkeley SkyDeck, Cariplo Factory, and Lendlease, provides funding and acceleration to top European startups, through which **AllStent has secured a €145,000 investment**, fueling its mission to revolutionize pre-procedural planning for thoracic aortic stent grafting (TEVAR) by enabling personalized stent selection and risk assessment to improve patient outcomes.

### ABOUT AllStent

A Politecnico di Milano spin-out founded in July 2024, AllStent leverages expertise from Dr. Migliavacca’s Computational Biomechanics group to improve TEVAR surgical planning. Using high-fidelity 3D simulations and digital twins, it helps surgeons optimize stent-graft selection and deployment, reducing risks and improving outcomes.
